

The power of time

Today is tomorrow

All too often, people put off doing things that they know are good for them. We've all heard the excuses: "I'll go on a diet...after the holidays;" or "I'll go to the gym...when I have more time." Procrastination is also a problem when it comes to making important personal financial decisions, such as those involving investments: "I'll start investing...when I have more money;" or "I'll start investing...next year." Such delays can be harmful and expensive. Conversely, getting an early start on investing can help you and your family realize important financial goals.

Over the years and decades, the "magic of compounding" can make a profound difference in the size of your nest egg.

Put time on your side

By getting an early jump on investing, you put the power of time on your side. Over the years, the "magic of compounding" can make a profound difference in the size of your nest egg. Put simply, your "earnings earn earnings." That means that reinvesting your interest, dividends and capital gains over many years can help your nest egg grow significantly. The longer you invest, the greater wealth you'll potentially accumulate. Although this concept would seem to be intuitive, many people fail to recognize the enormous benefits that can accrue from investing over a long period of time. To illustrate the power of time, let's take a look at two examples.

A tale of two brothers

Let's consider the hypothetical example of twin brothers – Willie and Aaron. Willie wants to build

a nice nest egg for retirement, so starting at age 36, he invests \$4,000 each year in an Individual Retirement Account (IRA) and earns an average annual return of 8 percent. Willie invests for 20 years, stops at age 55 and leaves his money untouched for the next 10 years.

Aaron also wants to build a nice nest egg for retirement, but unfortunately, Aaron is a procrastinator. He starts investing at age 46, 10 years after his brother. Like Willie, Aaron invests \$4,000 each year into an IRA that earns 8 percent annually. He too invests for 20 years, and stops at age 65. Although all factors are identical – except for the start date – the chart below shows the significant impact of starting early. Willie accumulates \$426,802 at age 65, while Aaron's total at age 65 is \$197,692. Remember, each invested the same total amount: \$80,000. Investing at an earlier age and putting the power of time to work gave Willie a nest egg that was more than twice as large as his brother Aaron's.

When I'm 65

This illustration is hypothetical and does not reflect the performance of any Foresters Financial product or any other specific investment. Investment return and principal will fluctuate so that shares when redeemed may be worth more or less than their original value. This illustration does not reflect the impact of taxes or fees. After applicable taxes and fees, values will be less. Changes in tax rates and tax treatment of investment earnings and applicable tax laws may also impact results.

Financial Wellness & Education

Willie wins again

To show just how powerful an advantage an early start can be, let's change one factor in the previous example. In this scenario, Willie again starts investing \$4,000 each year beginning at age 36 and earns an annual return of 8 percent. However, let's assume he stops investing at age 45 – after just 10 years – and leaves his money untouched in his IRA.

Aaron, ever the procrastinator, again waits until age 46 to start investing \$4,000 a year into an IRA that earns an annual return of 8 percent. Aaron continues to invest annually for 20 years until age 65. As the graph below illustrates, the results for Willie and Aaron are once again dramatically different. Aaron invested \$80,000 and had accumulated \$197,692 by age 65. However, Willie invested half as much – \$40,000 – but

had accumulated \$291,692 by age 65 – nearly 50 percent more money than Aaron. As these numbers show, it clearly pays to put time on your side.

Don't wait

As illustrated by the stark contrast in the results Willie and Aaron achieved, procrastinating can have serious consequences. When it comes to investing, don't delay; contact your Representative today. He or she can be a valuable resource who can help you put the power of time on your side. Your Representative can analyze your current financial situation, help you pinpoint your goals and gauge your risk tolerance. He or she can also discuss what products may be suitable for your unique needs and make specific investment recommendations.

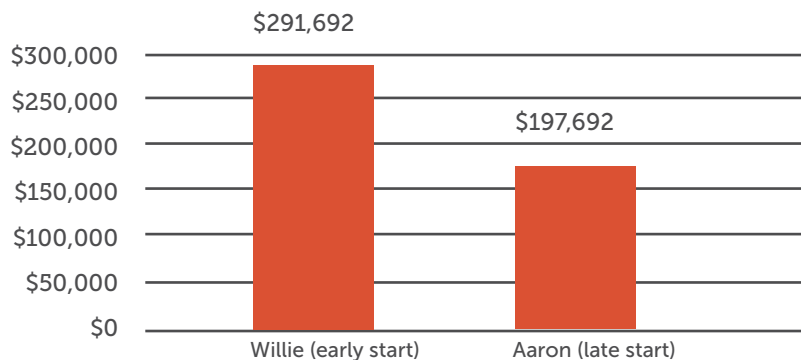

Benefit from our experience

Foresters Financial Services, Inc. provides everyday families and individuals with financial solutions, guidance and tools, to meet their needs across all life stages. Our Financial Representatives offer personalized service combined with a solid, long-term approach and fresh thinking to help you:

- Save and invest for retirement, education and other life events
- Create retirement income strategies
- Protect the ones you love
- Plan your legacy

Together, we can help you achieve financial and family well-being—now and tomorrow, this generation and the next.
