Investment Objective and Strategy

The Fund seeks long-term capital appreciation. The Fund invests in a portfolio of equity securities and writes (sells) call options on those securities. Under normal market circumstances, the Fund will write (sell) call options on at least 80% of the Fund's total assets. The Fund will normally write (sell) covered call options listed on U.S. exchanges on the equity securities held by the Fund to seek to lower the overall volatility of the Fund's portfolio, protect the Fund from market declines and generate income. The Fund's equity investments will consist primarily of common stocks of large-size U.S. companies, certain of which may pay dividends, and U.S. dollar-denominated equity securities of foreign issuers (i.e., American Depositary Receipts (ADRs)), traded on U.S. securities exchanges. To a lesser extent, the Fund may also invest in and write (sell) covered call options on securities of mid- and small-capitalization issuers and exchange-traded funds (ETFs) that track certain market indices, such as the S&P 500. The nature of the Fund is such that it may be expected to underperform equity markets during periods of sharply rising equity prices; conversely, the Fund seeks to reduce losses relative to equity markets during periods of declining equity prices.

The performance data quoted represents past performance. Past performance does not guarantee future results. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. Performance of share classes will differ because each class is sold pursuant to different sales arrangements and bears different expenses. For performance data current to the most recent month-end call 800 524 2803 or visit forestersfinancial.com. Returns may reflect waivers or reimbursements of certain expenses. Absent these waivers or reimbursements, returns may be lower.

Fee Structure

Shareholder fees (fees paid directly from your investment)	Class A		Advisor Class	
Maximum sales charge (load) imposed on purchases (as a percentage of offering price)	5.75% ¹		None	
Maximum deferred sales charge (load) (as a percentage of the lower of purchase price or redemption price)	1.00% ²		None	

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	Class A		Advisor Class	
Management Fees	0.80%		0.80%	
Distribution and Service (12b-1) Fees	0.25%		None	
Other Expenses ³	0.43%		0.32%	
Total Annual Fund Operating Expenses	1.48%		1.12%	
Fee Limitation and/or Expense Reimbursement ⁴	0.18%		0.15%	
Total Annual Fund Operating Expenses After Fee Limitation and/or Expense Reimbursement	1.30%		0.97%	

¹ Due to rounding of numbers in calculating a sales charge, you may pay more or less than what is shown above.

² A CDSC of 1.00% will be assessed on certain redemptions of Class A shares that are purchased without a sales charge.

³ Expenses are based on estimated expenses expected to be incurred for the fiscal year ending September 30, 2017.

⁴ The Adviser has contractually agreed to limit fees and/or reimburse expenses of the Fund until at least January 31, 2018, to the extent that Total Annual Operating Expenses (exclusive of interest expenses, taxes, brokerage commissions, acquired fund fees and expenses, dividend costs related to short sales, and extraordinary expenses, such as litigation expenses, if any) exceed 1.30% for Class A and 0.97% for Advisor Class. The Adviser can be reimbursed by the Fund within three years after the date the fee limitation and/or expense reimbursement has been made by the Adviser, provided that such repayment does not cause the expenses of the Fund's Class A or Advisor Class shares to exceed the applicable expense ratio in place at the time the expenses are waived or assumed or the current limits established under the Expense Limitation Agreement. The fee limitation and/or expense reimbursement may be terminated or amended prior to January 31, 2018, only with the approval of the Fund's Board of Trustees.

Glossary of Terms

The CBOE S&P 500 BuyWrite Index (BXM) is a benchmark index designed to track the performance of a hypothetical buy-write strategy on the S&P 500 Index. The BXM is a passive total return index based on (1) buying an S&P 500 stock index portfolio, and (2) "writing" (or selling) the near-term S&P 500 Index (SPXSM) "covered" call option, generally on the third Friday of each month. The SPX call written will have about one month remaining to expiration, with an exercise price just above the prevailing index level (i.e., slightly out of the money). The SPX call is held until expiration and cash settled, at which time a new one-month, near-the-money call is written. Alpha is a measure of performance on a risk-adjusted basis. Beta measures market volatility; a benchmark generally has a beta of 1.0; an investment with a beta under 1.0 is considered less volatile. R-Squared measures the percentage of a fund or security's movements that can be explained by movements in a benchmark index. Standard Deviation is a statistical measure of the historical volatility of a mutual fund or portfolio; the higher the number the greater the risk. Sharpe Ratio measures reward vs. risk; a higher number is more favorable. Portfolio Turnover is reflective of quarter end.
