## Investment Objective and Strategy

The Fund seeks long-term capital growth. The Fund invests in a diversified portfolio of common stocks of companies that are located throughout the world, including the United States. Although the Fund primarily invests in stocks of U.S. and foreign companies that are considered large to medium in size (measured by market capitalization) and that are traded in larger or more established markets, it may invest a significant amount in less-developed or emerging markets. The Fund may also invest (to a lesser degree) in smaller size companies.

## Growth of \$10,000 Investment

The Growth of \$10,000 Investment graph shows cumulative return of an initial investment of \$10,000 from 12/31/2007 to 12/31/2017. Figures include reinvestment of capital gains and dividends, but do not reflect the effect of any sales charges or redemption fees, which would lower these figures. The illustration is not intended to imply any future performance of the Fund. Past performance is no guarantee of future results.

\*The Since Inception average annual total returns shown for the Advisor Class Shares and the benchmark are for the period since the commencement of those classes on 04/01/2013.

The performance data quoted represents past performance. Past performance does not guarantee future results. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. Performance of share classes will differ because each class is sold pursuant to different sales arrangements and bears different expenses. For performance data current to the most recent month-end call 800 524 2803 or visit [forestersfinancial.com](http://forestersfinancial.com). Returns may reflect waivers or reimbursements of certain expenses. Absent these waivers or reimbursements, returns may be lower.

## Fee Structure

Shareholder fees (fees paid directly from your investment)		
	Class A	Advisor Class
Maximum sales charge (load) imposed on purchases (as a percentage of offering price)	5.75% <sup>1</sup>	None
Maximum deferred sales charge (load) (as a percentage of the lower of purchase price or redemption price)	1.00% <sup>2</sup>	None

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)		
	Class A	Advisor Class

## Glossary of Terms

World-stock portfolios have few geographical limitations. It is common for these portfolios to invest the majority of their assets in the U.S., Europe, and Japan, with the remainder divided among the globe's smaller markets. These portfolios typically have 20%-60% of assets in U.S. stocks. MSCI All Country World Index is a free float-adjusted market capitalization weighted index designed to measure the equity market performance of developed and emerging market country indices. The index consists of 45 country indices, including 24 developed and 21 emerging market country indices. Indexes are unmanaged and do not reflect the performance of any particular security. Alpha is a measure of performance on a risk-adjusted basis. Beta measures market volatility; a benchmark generally has a beta of 1.0; an investment with a beta under 1.0 is considered less volatile. R-Squared measures the percentage of a fund or security's movements that can be explained by movements in a benchmark index. Standard Deviation is a statistical measure of the historical volatility of a mutual fund or portfolio; the higher the number the greater the risk. Sharpe Ratio measures reward vs. risk; a higher number is more favorable. Portfolio Turnover is reflective of quarter end.
