** Measured against the Fund's benchmark

Investment Objective and Strategy

The Fund seeks long-term growth of capital. The Fund invests primarily in common stocks of small-size companies that the Fund's adviser Foresters Investment Management Company, Inc. believes are undervalued, and generally invests in companies that are experiencing a "special situation" that makes them undervalued relative to their long-term potential. Developments creating special situations may include mergers, spin-offs, litigation resolution, new products or management changes. The Fund may also invest in stocks of mid-size or large companies.

Sector Allocation (%)

Financials	20.10%
Consumer Discretionary	17.00%
Industrials	13.60%
Information Technology	12.20%
Health Care	11.40%

Trinseo SA	1.80%	Hill-Rom Holdings, Inc.	1.40%

Growth of \$10,000 Investment

Special Situations Fund \$19,486

The Growth of \$10,000 Investment graph shows cumulative return of an initial investment of \$10,000 from 6/30/2007 to 6/30/2017. Figures include reinvestment of capital gains and dividends, but do not reflect the effect of any sales charges or redemption fees, which would lower these figures. The illustration is not intended to imply any future performance of the Fund. Past performance is no guarantee of future results.

Benchmark	4.99	24.60	7.36	13.70	6.92	11.32

The performance data quoted represents past performance. Past performance does not guarantee future results. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. Performance of share classes will differ because each class is sold pursuant to different sales arrangements and bears different expenses. For performance data current to the most recent month-end call 800 524 2803 or visit forestersfinancial.com. Returns may reflect waivers or reimbursements of certain expenses. Absent these waivers or reimbursements, returns may be lower.

*The Since Inception average annual total returns shown for the Advisor Class Shares and the benchmark are for the period since the commencement of those classes on 04/01/2013.

Fee Structure

Shareholder fees (fees paid directly from your investment)	Class A		Advisor Class	
Maximum sales charge (load) imposed on purchases (as a percentage of offering price)	5.75% ¹		None	
Maximum deferred sales charge (load) (as a percentage of the lower of purchase price or redemption price)	1.00% ²		None	

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	Class A		Advisor Class	
Management Fees	0.81%		0.81%	
Distribution and Service (12b-1) Fees	0.30%		None	
Other Expenses	0.23%		0.23%	
Acquired Fund Fees & Expenses	0.01%		0.01%	
Total Annual Fund Operating Expenses	1.35%		1.05%	

¹ Due to rounding of numbers in calculating a sales charge, you may pay more or less than what is shown above.

² A CDSC of 1.00% will be assessed on certain redemptions of Class A shares that are purchased without a sales charge.

Mid-Size and Small-Size Company Risk. Undervalued Security Risk. Security Selection Risk.*

Glossary of Terms

Small-blend portfolios favor U.S. firms at the smaller end of the market-capitalization range. Some aim to own an array of value and growth stocks while others employ a discipline that leads to holdings with valuations and growth rates close to the small-cap averages. Stocks in the bottom 10% of the capitalization of the U.S. equity market are defined as small cap. The blend style is assigned to portfolios where neither growth nor value characteristics predominate. The Russell 2000 Index is an unmanaged index that measures the performance of the small-cap segment of the U.S. equity universe. The Index consists of the smallest 2,000 companies in the Russell 3000 Index (which represents approximately 98% of the investable U.S. equity market). Indexes are unmanaged and do not reflect the performance of any particular security. Alpha is a measure of performance on a risk-adjusted basis. Beta measures market volatility; a benchmark generally has a beta of 1.0; an investment with a beta under 1.0 is considered less volatile. R-Squared measures the percentage of a fund or security's movements that can be explained by movements in a benchmark index. Standard Deviation is a statistical measure of the historical volatility of a mutual fund or portfolio; the higher the number the greater the risk. Sharpe Ratio measures reward vs. risk; a higher number is more favorable. Portfolio Turnover is reflective of quarter end.
