Investment Objective and Strategy

The Fund seeks a high level of current income. Under normal circumstances, the Fund will invest at least 80% of its net assets (plus any borrowings for investment purposes) in floating rate loans and/or bonds. The Fund will normally invest the majority of its assets in U.S. dollar denominated senior secured floating rate loans and/or bonds. The Fund may invest in floating rate loans and/or bonds of any maturity or credit quality, but typically will invest in short duration below investment grade floating rate loans and/or bonds (commonly referred to as "high-yield" or "junk bonds"). The Fund generally will acquire floating rate loans as assignments from lenders.

The Credit Quality table depicts the composite ratings of the Fund's portfolio holdings. The composite ratings reflect an average of the ratings assigned to a security by up to three major credit rating agencies, typically Standard and Poor's Rating Services, Moody's Investors Services, Inc., and Fitch Ratings, Inc. The ratings are converted into their numeric equivalents before being averaged to allow for rounding when necessary. The average is then converted back to the equivalent alphabetical rating reflected in the table. The Fund's subadviser performs its own credit analysis of securities that are unrated and assigns comparable ratings that are used for compliance with the Fund's investment policies.

Growth of \$10,000 Investment

The Growth of \$10,000 Investment graph shows cumulative return of an initial investment of \$10,000 from 10/18/2013 to 9/30/2018. Figures include reinvestment of capital gains and dividends, but do not reflect the effect of any sales charges or redemption fees, which would lower these figures. The illustration is not intended to imply any future performance of the Fund. Past performance is no guarantee of future results.

The performance data quoted represents past performance. Past performance does not guarantee future results. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. Performance of share classes will differ because each class is sold pursuant to different sales arrangements and bears different expenses. For performance data current to the most recent month-end call 800 524 2803 or visit foresters.com. Returns may reflect waivers or reimbursements of certain expenses. Absent these waivers or reimbursements, returns may be lower.

Fee Structure

Shareholder fees (fees paid directly from your investment)		
	Class A	Advisor Class
Maximum sales charge (load) imposed on purchases (as a percentage of offering price)	2.50% ^{1,2}	None
Maximum deferred sales charge (load) (as a percentage of the lower of purchase price or redemption price)	1.00% ³	None

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)		
	Class A	Advisor Class
Management Fees	0.60%	0.60%
Distribution and Service (12b-1) Fees	0.30%	None
Other Expenses	0.34%	0.32%
Total Annual Fund Operating Expenses	1.24%	0.92%
Fee Limitation and/or Expense Reimbursement ⁴	0.14%	0.02%
Total Annual Fund Operating Expenses After Fee Limitation and/or Expense Reimbursement	1.10%	0.90%

¹ Effective June 12, 2017, the maximum sales charge on Class A Shares was changed from 5.75% to 2.50%.

² Due to rounding of numbers in calculating a sales charge, you may pay more or less than what is shown above.

³ A CDSC of 1.00% will be assessed on certain redemptions of Class A shares that are purchased without a sales charge.

⁴ The Adviser has contractually agreed to limit fees and/or reimburse expenses of the Fund until at least January 31, 2019, to the extent that Total Annual Fund Operating Expenses (exclusive of interest expenses, taxes, brokerage commissions, acquired fund fees and expenses, dividend costs related to short sales, and extraordinary expenses, such as litigation expenses, if any) exceed 1.10% for Class A and 0.90% for Advisor Class shares. The Adviser can be reimbursed by the Fund within three years after the date the fee limitation and/or expense reimbursement has been made by the Adviser, provided that such repayment does not cause the expenses of the Fund's Class A or Advisor Class to exceed the applicable expense ratio in place at the time expenses were waived or assumed. The fee limitation and/or expense reimbursement may be terminated or amended prior to January 31, 2019, only with the approval of the Fund's Board of Trustees.

Glossary of Terms

Bank-loan portfolios primarily invest in floating-rate bank loans instead of bonds. In exchange for their credit risk, these loans offer high interest payments that typically float above a common short-term benchmark such as the London Interbank Offered Rate, or LIBOR. The Credit Suisse Leveraged Loan Index is designed to represent the investable universe of the U.S. dollar-denominated leveraged loan market. The Index includes U.S. dollar denominated institutional term loans and fully funded delayed draw term loans which have high yield ratings. However, the most aggressively rated loans and non-rated loans are excluded. Loans can be rated as high as Baa1 and as low as BB3 by Moody's and also as high as BBB+ and as low as B- by S&P. A loan with the highest allowable rating from each agency will only be included if the company's overall rating is below investment grade. Loans must be issued by companies domiciled in a developed market, and defaulted loans may remain in the Index only if they remain current on loan obligation payments throughout the default process. Indexes are unmanaged and do not reflect the performance of any particular security. Alpha is a measure of performance on a risk-adjusted basis. Beta measures market volatility; a benchmark generally has a beta of 1.0; an investment with a beta under 1.0 is considered less volatile. R-Squared measures the percentage of a fund or security's movements that can be explained by movements in a benchmark index. Standard Deviation is a statistical measure of the historical volatility of a mutual fund or portfolio; the higher the number the greater the risk. Sharpe Ratio measures reward vs. risk; a higher number is more favorable. Portfolio Turnover is reflective of quarter end.
