Investment Objective and Strategy

The Fund seeks long-term capital growth. The Fund invests primarily in mid- and small-size companies that the Fund's investment adviser Foresters Investment Management Company, Inc. believes offer strong growth opportunities. The Fund may continue to hold stocks of mid- and small-size companies that grow into large companies and may also invest opportunistically in stocks of larger companies.

Sector Allocation (%)

- Consumer Discretionary 15.8%
- Financials 15.2%
- Information Technology 14.8%

Growth of \$10,000 Investment

The Growth of \$10,000 Investment graph shows cumulative return of an initial investment of \$10,000 from 9/30/2008 to 9/30/2018. Figures include reinvestment of capital gains and dividends, but do not reflect the effect of any sales charges or redemption fees, which would lower these figures. The illustration is not intended to imply any future performance of the Fund. Past performance is no guarantee of future results.

Advisor Class	-	6.82	10.53	8.90	-	10.88
Benchmark	7.49	14.21	15.68	11.91	12.49	

The performance data quoted represents past performance. Past performance does not guarantee future results. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. Performance of share classes will differ because each class is sold pursuant to different sales arrangements and bears different expenses. For performance data current to the most recent month-end call 800 524 2803 or visit foresters.com. Returns may reflect waivers or reimbursements of certain expenses. Absent these waivers or reimbursements, returns may be lower.

*The Since Inception average annual total returns shown for the Advisor Class Shares and the benchmark are for the period since the commencement of those classes on 04/01/2013.

Fee Structure

Shareholder fees (fees paid directly from your investment)		
	Class A	Advisor Class
Maximum sales charge (load) imposed on purchases (as a percentage of offering price)	5.75% ¹	None
Maximum deferred sales charge (load) (as a percentage of the lower of purchase price or redemption price)	1.00% ²	None

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)		
	Class A	Advisor Class
Management Fees	0.70%	0.70%
Distribution and Service (12b-1) Fees	0.30%	None
Other Expenses	0.20%	0.18%
Acquired Fund Fees & Expenses	0.01%	0.01%
Total Annual Fund Operating Expenses	1.21%	0.89%

¹ Due to rounding of numbers in calculating a sales charge, you may pay more or less than what is shown above.

² A CDSC of 1.00% will be assessed on certain redemptions of Class A shares that are purchased without a sales charge.

Important Information

This information should be preceded or accompanied by a current prospectus or summary prospectus which may be obtained by downloading it from our website, contacting your Representative, or calling 800 524 2803. There is no guarantee that the Fund will meet its stated investment objective. The principal risks of investing in the Fund are: *Market Risk. Mid-Size and Small-Size Company Risk. Security Selection Risk.*

Glossary of Terms

The typical mid-cap blend portfolio invests in U.S. stocks of various sizes and styles, giving it a middle-of-the-road profile. Most shy away from high-priced growth stocks but aren't so price-conscious that they land in value territory. The U.S. mid-cap range for market capitalization typically falls between \$1 billion and \$8 billion and represents 20% of the total capitalization of the U.S. equity market. The blend style is assigned to portfolios where neither growth nor value characteristics predominate. The S&P Mid-Cap 400 Index is an unmanaged capitalization-weighted index of 400 stocks designed to measure the performance of the mid-range sector of the U.S. stock market. Indexes are unmanaged and do not reflect the performance of any particular security. Alpha is a measure of performance on a risk-adjusted basis. Beta measures market volatility; a benchmark generally has a beta of 1.0; an investment with a beta under 1.0 is considered less volatile. R-Squared measures the percentage of a fund or security's movements that can be explained by movements in a benchmark index. Standard Deviation is a statistical measure of the historical volatility of a mutual fund or portfolio; the higher the number the greater the risk. Sharpe Ratio measures reward vs. risk; a higher number is more favorable. Portfolio Turnover is reflective of quarter end.
