

Retirement Savings in America

then and now

1991

Half of all American workers planned to retire before age 65¹

2018

Today, that number has plummeted to 21%¹

now and later

2018

47.8 million senior citizens were living in the U.S.²

2060

that number is expected to double²

in fact ...

29%

of workers have estimated their expenses in retirement¹

19%

of workers have calculated how much they will need in healthcare expenses¹

the average cost of assisted living facilities ROSE 3.36% from 2016 costs to:

\$3,750³ per month

and yet ...

36%

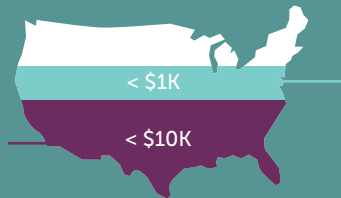

of Americans say they don't contribute to retirement accounts¹

of all American workers:

37%

have less than \$10,000 saved for retirement¹

26%

have less than \$1,000 saved for retirement¹

so what can you do?

Regularly increase your savings rate every year—you won't miss it and every bit counts.
